

Ceiling Mounts and Telescopic Arms

AbleCenter® comes mounted on a 60 x 60 cm ceiling panel, which easily replaces one of the regular 60 x 60 cm ceiling tiles found in most classrooms with acoustic ceilings to current standards.

We also offer alternative mounts for classrooms and meeting rooms with different ceilings.

The following mounts can replace standard ceiling tiles to position the camera below the ceiling at the desired height if there are major obstacles such as pendant lights, beams or ventilation ducts or to install a telescopic arm without the standard ceiling mount or as a wall-mounted installation

- 200217 Component box 40 for AbleCenter® (all models)
- 200708 Component box 60 for AbleCenter® (all models)
- 200729 Roof mount arm for AbleCenter AC-03
- 200730 Wall mount arm for AbleCenter AC-03
- 200727 Extension arm 20 for AbleCenter AC-03
- 200728 Extension arm 40 for AbleCenter AC-03
- 200707 Corner mounts (set of 4 pcs)

We have encountered most types of ceiling over the years. If you are unsure which mount is the most suitable for your installation, please get in touch or send us a photo.
